

Marumi Fit+Slim Filters

Marumi has launched their new Fit & Slim Filters range of entry-level camera lens filters as the successor of the Marumi MC and MC-UV series. The new Fit & Slim Range is named such because of their slim frame whilst still enabling the user to attach a lens cap securely. They are available in MC Lens Protect, MC UV Cut + Lens Protect (L390), and Circular Polariser.

The 'Lens Protect' will protect your lens from dust and scratches. The 'UV Cut + Lens Protect' will additionally cut UV rays and a wavelength of 930nm and under to reproduce clear images of distant views. The 'Circular Polarizer' increases the colour saturation and reduces reflections.

All Marumi Filters are manufactured in Japan. For more than 60 years, Marumi has focused exclusively on innovating, developing and manufacturing filters for cameras.

Key Features:

- Ultra Slim 5.4mm satin finished frame for low reflections (UV and Lens Protect)
- 8 layers multi coating on Lens Protect and UV filters
- Newly developed high pressure press method to attach lens cap to hold it securely
- Eco-friendly filters made of lead free materials
- Available in sizes 49mm up to 82mm
- Lightweight
- New design slim retail packaging
- Made In Japan

Pursues Higher Image Quality and Easier Handling

Reduces flare and ghosting and supports filter attachment.
